

Gurez Mart

App Install Campaign Performance Report

Meta Ads | Karnal, Haryana | 26 Sep – 1 Oct 2026

Prepared by: Digital Marketing Analyst

Campaign Approach

How the campaign was designed

I promoted the Gurez Mart grocery-delivery app to drive installs among households in Karnal who already show interest in online grocery shopping.

Who

- Karnal, hyperlocal radius pins
- Age 18–65+, all genders
- Online grocery interests

What we said

- Fresh groceries, fast doorstep delivery
- English and local Hinglish copy
- “Install now” CTA

How we tested

- 2 ads: video + static creatives
- Advantage+ audience and placements
- Compare cost per install by age and gender

Target Persona

Assumed profile, based on targeting and the demographic results

Background and Demographics	Target Persona Name	Needs
- Male 32 years old - Working professional - Middle income - Married, family household - Lives in Karnal city (urban)	Busy Shopper Karan	- Fresh fruits & vegetables - Daily grocery essentials at home - Fast, reliable doorstep delivery
Hobbies	Goals	Barriers
- Watching Reels on Instagram and Facebook - Online shopping - Cricket - Family outings	- Save the trip to the market - Get fresh quality every time - Find a trusted local grocery app	- Not much time - Trust in a new app - Habit of buying from the local shop - Price compared with the market

Marketing Objective

Drive mobile app installs of Gurez Mart from grocery shoppers in Karnal at an efficient cost per install.

Campaign window

26 Sep – 1 Oct 2026

Campaign type

App promotion (Advantage+ app campaign)

KPI

What success is measured by

Mobile app installs

Primary KPI: volume of installs

Cost per install

Primary KPI: efficiency vs peers

Key Results

Latest snapshot, 26 Sep – 1 Oct 2026

349

Mobile app installs

₹5.06

Cost per install

₹1,764.82

Amount spent

44,322

Reach*

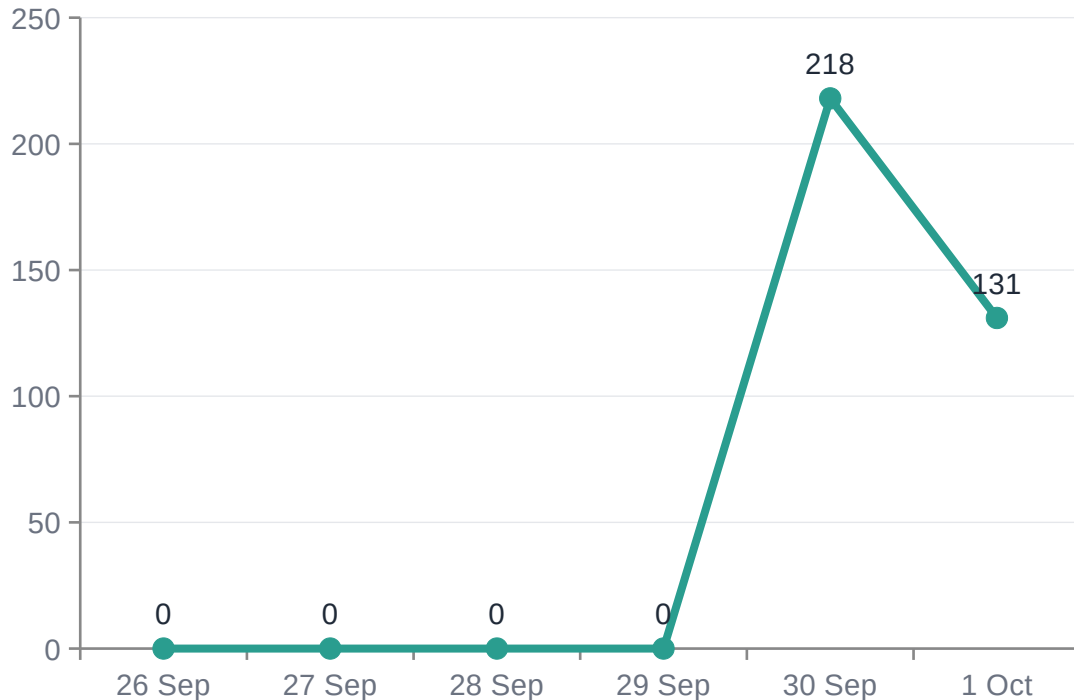

Benchmark

- Meta: CPI is 20% lower than similar ad sets (peer median \$8.94).
- Cost per result is 18.22% below the industry benchmark.

*Reach 44,322 and frequency 2.28 are from an earlier snapshot (318 installs, ₹5.48 CPI).

Daily Installs Trend

Delivery began ramping on 29–30 Sep; values approximate, read from the Ads Manager chart

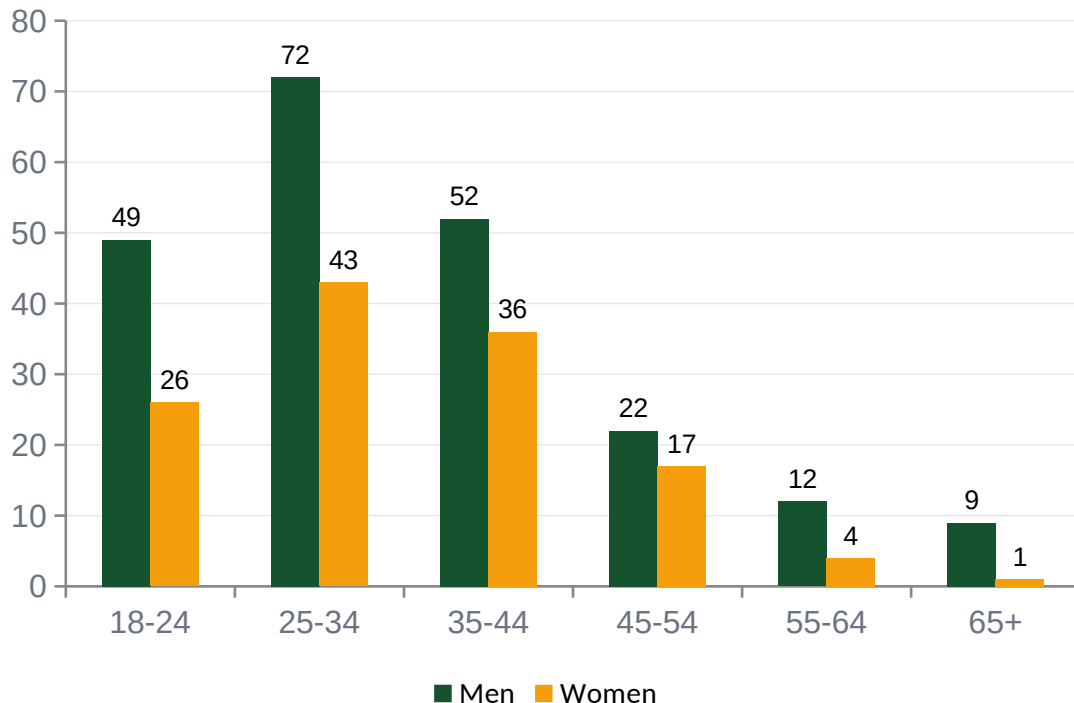

Takeaways

- ~63% of installs came on 30 Sep (peak day).
- 1 Oct slowed to ~131 as the day was still in progress.
- Budget is limiting delivery (Meta flag), so scaling spend should lift volume.

Demographics: Age & Gender

Installs by age group (approx. from chart); totals from Ads Manager

Men

62% of installs (216)

Cost/install ₹5.50

Women

36% of installs (127)

Cost/install ₹4.51

~18% cheaper than men

Campaign Evaluation

What worked

- CPI of ₹5.06 beats peers (-20%) and industry benchmark (-18%).
- Hyperlocal Karnal targeting delivered 349 installs on ₹1,765.
- 25-34 is the largest group (115 installs) at ₹4.02-5.65 CPI.
- Women convert more cheaply (₹4.51 vs ₹5.50).

Watch-outs

- Budget limits delivery; opportunity score is only 8/100.
- Meta's age insight (65+ cheapest ₹5.10, 25-34 priciest) conflicts with the chart; verify at ad level.
- Frequency of 2.28 may signal fatigue if reach stays flat.
- Installs ≠ orders: no first-order or purchase value tracked.
- Ad-level split not captured in the data.
